

## Sylvia Anderson

Why should New Mexico be only spot in the nation to store dangerous nuclear waste. Our "SAFE" storage leaked and the repair took three years. We are crime ridden and rank at the very bottom of state educational standings. Our national leaders are helping us by transporting all national nuclear waste through New Mexico to storage in New Mexico. As proved by the leak just repaired there is NO SAFE NUCLEAR STORAGE! It will leak and there will be transportation accidents!! I stand with the old saying .... NOT IN MY BACKYARD!!
