

Southeast New Mexico College

For over eight years WIPP has partnered with Southeast New Mexico College (SENMC) to provide the WIPP Leadership Academy to employees at the facility. Next week we will graduate the 26th cadre. This training, refined and continuously improved over the years, is designed to enhance and expand the WIPP team's knowledge and skills in support of its mission. It includes both leadership development and site specific understanding, while emphasizing the essential need for fostering a safety culture. Please accept SENMC's endorsement of and support for the renewal of the WIPP permit.
