Re: WIPP Renewal Draft Permit

I strongly object to any extension for transporting and storing radioactive waste to WIPP beyond 2024. DOE's promise and negotiated deal with the people of our state of New Mexico as represented by NM must be respected. DOE must establish a repository or repositories in other states.

Expansion of WIPP must not be allowed. DOE has lied about its panel measurements, tried to coverup its unsafe waste handling, and endangered workers. DOE cannot be trusted. I pray we will survive another year of those activities.
