## DOE Still Plans to Expand WIPP

It wants to expand the size of the repository to more than double the current size.

It wants to expand the volume or amount of waste.

It wants to expand the type of waste by bringing powdered surplus plutonium to WIPP.

It wants to eliminate any disposal end date.

In short, DOE wants to use New Mexico in any and all ways that suit them.

WHERE are the agreements that DOE made in the 1970's?? If DOE does not honor those provisions, how can we trust them on anything they say now and in the future?

New Mexicans do NOT want any more WIPP expansion.

We DO want a definite closure date for WIPP.

We want NMED to rigorously enforce the provisions that have been put into the Permit to limit WIPP expansion.

Thank you,

Lois Fuller
