Jean Stevens

The USA must stop making nuclear waste! 100% effort for wind, solar and hydro power not war.

To WIPP Renewal Draft Permit Team,

1. The plutonium pit must be halted immediately as modernization is causing an arms race with \$billions for weapons of mass extinction instead of scientific research to end climate change. <https://www.bmj.com/content/382/bmj.p1786>
2. Plutonium pit production will add an enormous amount of needless nuke waste, we don't need more nuke weapons!
3. Nuke plants must take care of their own nuke waste in a safe and responsible manner.
4. New Mexico has already been a nuke sacrificial zone during WW2 and the Cold War, the future for New Mexico is renewable energy and peaceful solutions of diplomacy. Nuke weapons are immoral and an archaic idea to create peace. Diplomacy is the solution for deterrence. Nuke weapon accidents and miscalculations have already occurred. How long can humanity's luck last? It is no longer appropriate and no longer necessary to make nuke weapons and nuke power plants. There are more sustainable and cleaner alternatives for the future. Please watch the film "The Man Who Saved the World" or "Television Event" to show what is at stake.

The future of humanity and all biodiversity is at stake!
