

Kate Hauer

I would like to request a public hearing. There are changes going on with this renewal that seem above and beyond a renewal and it seems like this would require an amendment to the hazardous waste permit? How can they extend the life of WIPP beyond 2024 when it is a state law that WIPP cannot be open beyond 2024? How many other sites store nuclear waste other than this pilot plant? How are oxidized plutonium pits classified as "TRU" waste? Doesn't there need to be an amendment to the state laws AND to the WIPP before any of these changes take place?
