

## Ellen Barber

I support the proposed regulations for nuclear waste storage, including

- (1) a requirement that the state receive a report each year on the federal government's efforts to find a permanent repository in another state,
- (2) automatic permit revocation if Congress changes the law increasing the disposal limit of 6.2 million cubic feet of storage, and
- (3) quarterly public forums that provide notice and allow ample opportunity for public engagement on permit-related and non-permit-related issues.

However, the permit should also include measures for giving public notice using **EQUITABLY ACCESSIBLE MEANS**. Notice in written English on the internet is **NOT** adequate. Many New Mexicans don't have internet access, and many do not communicate primarily in written English.

With the addition of adequate public notice measures, I support the proposed regulations for nuclear waste storage.
