

Mira Geroy

I am very concerned regarding several aspects of the WIPP pilot project renewal. First of all there was an agreement to designate additional sites in other states for some of the waste to be placed and this has not happened yet. Before this permit is renewed that designation needs to happen. In addition, I am concerned about the safety of transportation of the nuclear waste through a metropolitan area (Santa Fe). The careful transport methods need to be delineated in writing in detail and guaranteed before renewing the permit.

Sincerely,
Mira Geroy
