

Jeannie Watson

My name is Jeannie Watson and I have been a resident of Carlsbad for many years. I am in full support of the WIPP project and what it provides to the nation and to our community. I have followed the WIPP project from its inception and feel confident with the safety measures and stringent rules it imparts. I do not support the modifications being proposed and believe they can hinder the safe storing of waste at the WIPP site and the ongoing mission to safely store TRU from around the country. Please do not allow politics to interfere with the future of this project.
