

## Luis Quinones

The WIPP project is very dangerous to the health and well-being of New Mexico. We do not want nuclear waste in New Mexico. Where WIPP is stored continues to have natural earthquakes, not to mention the earthquakes which are caused by fracking. There needs to be a permanent repository that is NOT in New Mexico. As a matter of fact, the government needs to curtail or end (hey, I can dream) nuclear weapons production in order that we have less nuclear waste. Further, it is extremely dangerous to have such volatile and dangerous materials traveling through the cities and small towns in our state. Nuclear waste is just a terrible idea whose time has come. Please do not allow nuclear waste in New Mexico. If you do, it's only a matter of time before a disaster occurs due to human error, earthquakes, accidents, or other natural events.
