

New Mexico Environment Department (NMED)

I strongly support the NMED draft Permit that clarifies the priority to emplace legacy waste and reduce the risk of LANL legacy waste.

Along with thousands of other New Mexicans, I want the federal government to fulfill the agreement to prioritize LANL waste going to WIPP. Thus, I support provisions that require:

- From January 1, 2027 through December 31, 2031, **at least 55% of the total volume of all waste emplaced at WIPP from all generator/storage sites must be LANL legacy waste.**
- Beginning January 1, 2032, and until all LANL legacy waste has been emplaced at WIPP, **LANL legacy waste must be at least 75% of the total volume of waste emplaced from all generator/storage sites.**
- Legacy waste currently stored above-ground at LANL Material Disposal Area-G shall be **shipped and emplaced at WIPP by July 1, 2028.**
- If at any point any of those conditions are not met, **all generator/storage site shipments (with the exception of LANL) must cease until all deficiencies are cured.**

Thank you for protecting the health and safety of New Mexicans and our communities!
