

Barbara Calef

I strongly support the NMED draft permit that makes it clear to the D.O.E. that it has to move all the Cold War legacy waste that is stored unsafely at LANL into WIPP. These permit modifications simply describe how DOE will accomplish its original mission, which should be the first order of business. As a Los Alamos resident, I am very concerned that the next fire will breach the stored containers. They need to be put underground.
