

Elizabeth Foree

To NMED,

I am writing in support of the WIPP Agency-Initiated Modification Draft Permit as proposed by NMED because it will allow NMED to measure and track DOE's progress in identifying the legacy waste at LANL, and transport the waste to WIPP along the I-285 corridor where I live. Also NMED would set a penalty on DOE if the agreement is not timely fulfilled.

Thank you for considering my comments.
