

Christine Brickley

I am writing in support of the NMED Agency Initiated Modification Permit. As a retired Nurse Practitioner, I have seen firsthand the untoward health effects of waste storage on the people of New Mexico. The DOE is backing away from a settlement agreement made with the state in 2023. The NMED AIM permit proposal further clarifies and makes accountable the DOE, holding the DOE to the terms of the settlement agreement. Protect the health of our people by adopting the NMED AIM permit proposal.
