

Beth Cohen

As a proud and concerned resident of the State of New Mexico since 1983, I am fearful about the legacy waste being stored in tents near a place in Los Alamos where three major wildfires have recently occurred. Wildfire can occur at any time in New Mexico and especially now during the extreme and severe drought conditions we are currently experiencing.

I support NMED's modification of the WIPP permit and I won't feel safe until all the drums at Area G are placed in WIPP on July 1, 2028. The permit modification is necessary because DOE has shown itself to be a dishonest partner with our state and needs to be held accountable.
