

Dee Homans

We support the modification permit proposed by NMED. DOE has not fulfilled its promises. Legacy waste currently stored above ground at LANL needs to be buried at WIPP as originally intended..

We are afraid that there will be a push to prioritize the new waste generated by increased Pit Production instead of cleaning up the Cold War waste which currently puts us all at risk in the event of a wildfire or other natural disaster. Thank you, Edith Homans and Andrew Davis..Santa Fe

I'm writing in support of the WIPP Agency-Initiated Modification Draft Permit as proposed by NMED for the

following reasons:

- DOE's irresponsible storage of legacy waste threatens the health and safety of people and their property in

several states.

- The proposed permit modifications are needed because DOE is not fulfilling its legal agreements.

Thank you for considering my comments.
