

## Mary Gray McGee

I don't feel safe unless all the drums at Area G are moved to a safer place. I have lived in Santa Fe almost 50 years and I know how often fires occur.

DOE is a federal agency that doesn't care about the health and property of New Mexicans. There needs to be a penalty or DOE will ignore the agreement they made with us.

I understand that there are 2500 drums of old waste that the modified permit will ship to WIPP by July 1,2028.
