

## Rebecca Henderson

I am writing in support of the WIPP Agency-Initiated Modification Draft Permit as proposed by NMED. The legacy waste sitting in tents in Los Alamos poses a very real and terrifying threat not only to my home, but to all the people of New Mexico and our neighboring states. We are just one forest fire away from unimaginable destruction and loss of lives. There is no reason these barrels of nuclear waste should be stored in such an irresponsible and dangerous manner. We need to have them prioritized for transport to WIPP, for the safety of all New Mexicans and more.
