

## CELIA OWENS

2028 is not soon enough for me, but it is long enough for LANL to comply with the NMED AIM's priority to remove legacy waste off the mesa in Los Alamos, and send it to WIPP. I live just down the hill, and we feel like hostages in our own home every day until the waste is removed from this fire zone. Avoid the consequences of non-compliance, and take responsibility for public safety. Thank you.
