

Hildegard Adams

Dear NMED:

Please: Do everything you can to hold DOE accountable regarding the legacy waste at Los Alamos, which must be moved to the WIPP storage facility asap. As we all know that waste sits in tents in a WILDFIRE zone, putting ALL of us in New Mexico at high risk. And we know there are already wildfires burning in New Mexico, and we know there will be more.

The legacy waste in Los Alamos is DANGEROUS - if something goes wrong there we are all toast . Please: New Mexicans are counting on you, please protect us.
