

Melody Van Hoose

I am writing in support of the WIPP agency initiated modification being submitted by the NMED. It is time to get legacy waste out of Los Alamos and into the ground. I live in Santa Fe and dread the thought of having to evacuate from a fire finally reaching the containers. and making our beautiful city and northern New Mexico uninhabitable.

I tried submitting this form through the online portal and it did not work so I hope it reaches you all through email.

Thank you for your time on this issue.

Best,

Melody Van Hoose
