

Robert Stritzinger

The legacy nuclear waste, 2500 55 gallon barrels, sitting out in the dessert is a clear and present danger to the residents of Santa Fe, Los Alamos and Espanola. A fire could cause nuclear fallout and render the whole area uninhabitable. This would devastate, not only those cities but the whole state economy and government of NM. That legacy waste in Area G **MUST BE TOP PRIORITY** for disposal above **ALL ELSE!**
