

Treva Jenkins

To whom it may concern:

I'm a relatively new home owner in Eldorado at Santa Fe (5 years now). I recently learned about the dangerous unidentified nuclear waste being stored above ground near Los Alamos. I am greatly concerned about the risk to people, animals, our environment and home values should a wildfire occur. I'm also grateful to learn the NMED is prepared to exact consequences if these drums are not safely stored underground per the modified permit. As a constituent of Santa Fe County, I ask that you please address this matter as soon as possible.
