

Barb OConnor

I want to see that the DOE clean up All the Legacy Waste at LANL before taking on any other projects! The people in Los Alamos and in all the surrounding areas are at Risk and this Waste is finding its way into the Rio Grande

River also and affects many living things along the way! It is completely mind boggling that those involved in this Nuclear Industry want to build more plutonium pits, digging up more uranium, disturbing the environment, polluting air, water, land in the process! And they don't protect us from the WASTE that is sitting up there in Los Alamos! We are not going to get out of this alive and with great damage to us all. Please stop the Insanity of your ways and use our tax dollars to help humanity and all life before it is too late!
