

Donald Meaders

The Federal Government has never lived up to their agreement with the State of New Mexico. Los Alamos legacy waste was supposed to be taken first. This has not been done. It is currently stored in the most dangerous place possible. NO more waste should be moved to WIPP until this prior promise has been fulfilled!! Current pit production should be shut down unless and until this happens. We are under great threat until this occurs and it should be TOP Priority NOW!! Thank you for taking our comments.
