

## Cate Moses

My extended family all live downwind and downwater of LANL. Like any sane person, I am opposed to LANL's weapons-making mandate, which has brought us to the brink of nuclear extinction.

I support the New Mexico Environment Department (NMED) WIPP draft permit modification to speed up cleanup of Los Alamos National Lab (LANL) and focus WIPP on disposal of legacy waste.

In particular, I support the following provisions:

From January 1, 2027 through December 31, 2031, at least 55% of the total volume of all waste emplaced at WIPP from all generator/storage sites must be LANL legacy waste.

Beginning January 1, 2032, and until all LANL legacy waste has been emplaced at WIPP, LANL legacy waste must be at least 75% of the total volume of waste emplaced from all generator/storage sites.

Legacy waste currently stored above-ground at LANL Material Disposal Area-G shall be shipped and emplaced at WIPP by July 1, 2028.

If at any point any of those conditions are not met, all generator/storage site shipments (with the exception of LANL) must cease until all deficiencies are cured.
