

Marcus Pinzel

The unilateral PMR is not based on technical merit or regulatory compliance, WIPP can easily increase the number of shipments and meet the capricious and arbitrary requirements of the NMED PMR for "legacy" waste.

The NMED is nothing more than paid activists that wish to impact the national security of our nation that operate at the bidding of insane stakeholders and more than likely foreign adversaries. It is my hope that the EPA removes RCRA authority from New Mexico and we continue with the important national security interests of this nation.
