

Cassandra Reid

I support the AIM draft permit that clarifies the priority to emplace legacy waste. I'm relieved that it provides timelines for addressing contaminated waste currently stored above ground at LANL. I remain deeply concerned about the vast amounts of waste at LANL that the DOE has been dragging its feet on cleaning up. I urge the NMED to hold DOE accountable for cleaning up all waste at LANL in the future, beyond the waste that is covered by this Draft Permit.

Thank you,

Cassandra Reid
