

# Lura Brookins

It is imperative that safe storage of nuclear waste be the top priority of this nuclear industry. With all the brilliance sitting in Los Alamos, they MUST solve this issue FIRST!

Also, with this brilliance settled in Los Alamos, they can and MUST invent, create and utilize their own power sources! It is not fair or wise that this huge power need in Los Alamos be siphoning off our power and water in Santa Fe. Los Alamos can create its own solar/ wind in its own territory.

Finally, we must end the manufacture of nuclear bombs and, instead, focus our resources of human ingenuity and invention to green energy sources and safe disposal of nuclear waste, thus ending the nuclear era.

Thank you,

Lura Brookins

Santa Fe
