To Whom this may concern,

Given the opportunity to comment on the latest proposal to move contaminated waste to WIPP , I see no other alternative than to approve of this move. It is so criminal that this waste was even created. More certainly will be created in this era from the horrendous war products to fuel senseless wars.

LANL would be far better advised to produce solutions for world peace and environmental health as opposed to products that continue to dévasté and kill.

Since these wastes exist and have not been moved and are recklessly stored , I would hope that moving them to WIPP might be a sane move for the health of northern NM

Thank you, Emmy Koponen
