

Bert Snyder

I'm writing in support of the proposed modification of the WIPP waste transfer permit proposed by NMED. It is clear that after many years of non compliance by DOE to the terms of the original permit that the only way to insure the it follows those requirements is to add stricter controls and measurement of compliance. If DOE cannot or will not follow the guidelines then appropriate controls need to be activated as stated in the Proposed Modification.

Thank you for stepping up to protect us.
