

Lisa Blum

I'm writing in support of the WIPP Agency-Initiated Modification Draft Permit as proposed by NMED because DOE's irresponsible storage of legacy waste threatens the health and safety of people like me and my neighbors. It threatens our property values, properties in which we have invested money & sweat equity. Properties where we live and that we hope to pass on to the next generation.

DOE has been irresponsible in not dealing with this issue. We are just lucky that the fires in previous years have not gotten to the stored waste which would be catastrophic.

The proposed permit modifications are needed NOW!

Thank you for considering my comments.
