

Cindy Pabst

I'm writing in support of the WIPP Agency-Initiated Modification Draft Permit as proposed by NMED for the following reasons:

1. DOE's irresponsible storage of legacy waste threatens the health and safety of people and their property in several states.
2. The proposed permit modifications are needed because DOE is not fulfilling its legal agreements.
3. Is it possible you don't see and or understand that humanity and our future is at risk? It's easy for me to ignore this issue. I don't have children. I am not leaving a legacy to members of my family. But what about you? Let's forget for a second that you work for the government or a corporation. Surely, when you look around, you see other people. Who have families. Generations to come. Please think about this and think about how you want to be remembered in the collective unconscious of this world. Take a stand for lives well-lived.

Thank you.
