

Sandra Mcpherson

Hello,

I'm writing in strong support of NMEDs modification of the WIPP permit, NMED agency initiated modification or AIM. The LANL legacy waste must be moved immediately, before the next wildfire. Anyone in the west or southwest knows how explosive and unpredictable wildfire is now.

DOA must take its responsibilities seriously and put New Mexico citizens' safety first. Prolonging removal of LANL Legacy waste is irresponsible and potentially deadly. Please please do the right thing. This is urgent.

With respect,

Saundra Mcpherson and Martin Lawler

Santa Fe, New Mexico
