

## Lisa Crowner

I'm writing in support of the WIPP Agency-Initiated Modification Draft Permit as proposed by NMED for the following reasons:

DOE's irresponsible storage of legacy waste threatens the health and safety of people and their property in several states. The risk of fire and the improper storage of radioactive waste is a disaster just waiting to happen—much worse than any wildfire damage alone that could be imagined! The proposed permit modifications are needed because DOE is not fulfilling its legal agreements. Thank you for considering my comments.
