

Ellie Burnside

Dear TCEQ,

My name is Ellie Burnside, I live in Richardson, TX, and I am a constituent of Senator Ted Cruz, Senator John Cornyn, and Representative Mihaela Plesa. I am a volunteer with Citizen's Climate Lobby, a non-partisan and non-profit organization. I appreciate the opportunity to submit comments about proposed rule project number 2024-027-113-A1.

Methane is a potent greenhouse gas and threatens the health of Texas citizens, especially lower-income families and children. I believe every person deserves the right to clean air. I fully support implementing the EPA's methane reduction directive to its fullest extent. This would ensure complete compliance with 40 CFR Part 60, Subpart OOOOc. If TCEQ adopts ambitious and transparent standards that prioritize environmental health and align with Texas's responsibility to combat climate change, it will benefit the community and set a positive example for the rest of Texas government.

Sincerely,
Ellie Burnside
