

## Reed Bilz

I am one of the 1 million Tarrant County residents who lives less than 1/2 mile from a gas well. To protect us, we need comprehensive rules that reduce harmful emissions at these sites. Speedy adoption and significant enforcement by TCEQ is essential to our welfare and the environmental justice of those in affected communities.

I urge you to exercise your role as environmental advocates and publish and enforce rules that will curtail methane and other injurious emissions into the DFW area to bring us into compliance with federal regulations.
