

Mark McCasland

I am also a licensed Professional Engineer in Texas, and, while we are required 1 hour of ethics training per renewal period (annually), the training each year is mostly repetitive. It does include new rules, etc., but still only an hour. I think the 4 hours proposal is a bit excessive and 2-hours IN ADDITION TO the current renewal CEUs requirement or the initial 20 hours (plus 2 for resiliency) is sufficient. Like Resiliency, I think there should be a variety of 2-hour topics. Thank you.
