

Walter Wagnon

I'm in full support of Senate Bill 1397 aka TCEQ sunset bill. It is of paramount importance that air quality that can affect people's health is priority over a company's profit. Violators, especially repeat violators, need increased penalties to get their attention. Therefore, I am in favor of more vigilance, more reports, more regulations, more rejections along with more public outreach via comment periods, input requests, and public meetings, including more media coverage and emails to individuals in affected areas. Thank you for this opportunity to receive input from the public.
