

David Fletcher

To Whom It May Concern,

I David N Fletcher (an affected member) am concerned that the proposed list of Best Management Practices for Aggregate Production Operations is grossly inadequate for the proposed Vulcan Quarry. For starters, they do not address practices to minimize water consumption, noise, and light pollution, as was directed to by the Texas Legislature. The BMPs for the areas they do address — dust and water storage — also warrant serious improvement.

Due to the limited water availability and harmful dust particles the BMPs must be updated and revellnant . As stated I am affected class as I live within the 4 miles from proposed quarry.

The TCEQ must further develop their list of BMPs, making sure to thoroughly address all of the issues that the Legislature directed them to address.

Sincerely,
David N Fletcher
