

Katherine McMullen

I oppose the 3009 Vulcan Quarry.

The population in this area has increased rapidly requiring more housing and schools along with increased pressure on the roadways to accommodate the population growth. Clean water and good air quality is vital for this growth.

This proposed Quarry is also very close to a nature preserve and a world famous bat cave (Braken Bat Cave).

I believe best management practices include not allowing mining which could adversely affect the health and wellbeing of generations of Texans as well as damage or destroy our delicate Hill Country both above and below ground.
