

Fermin Ortiz

As a founding member of TRAM (Texans for Responsible Aggregate Mining) and founder of Save Sandy Creek and Save Lake LBJ, IE a long time advocate for APO BMPs, I was embarrassed to find that TCEQ chose to avoid the opportunity to develop some serious BMPs. Instead y'all opted to ignore the legislature's request to put some teeth into the BMPs in order to better protect Texas and our resources. As I read it, y'all are basically reminding the APOs to try to adhere to their permit application. Too weak. Thank you. Fermin Ortiz
