

Sheri Gray

In truth I would venture to say that generally speaking, Gillespie County doesn't invite government programs into their management practices because I have seen similar wording written in the county's business operational plan available on the county's website.

It would be extremely advantages to each and every person if these BMPs were relevantly adopted. However, it would be a treachery to us all if the BMPs would fail to be part in the management practices of Gillespie County. You may have an appreciation for this lovely geopgraphical area, BUT I was born here, along with 4 more generations of my family. I absolutely do not appreciate any and all negligence in the Management of our natural resources or of our community based on the leaders/managers "not wanting any of the additional paperwork" that goes along with government programs. That is a pretty lame excuse for not ensuring the future here for everyone. There must be order. There are no two ways about it. WHO will rise up and lead and manage with excellence?
