

Temeckia Derrough

I am a member of the cohort TRAM we strive to advocate to protect communities and residents of Texas from environmental injustices. I am a 46 year Dallas,Tx resident that lives in a Freedman Town community of color. Joppa faces environmental disparity that causing health issues because of bad air quality. The Joppa is surrounded by Batch Plants that releases 2.5 Particulate matter into the Joppa community air quality. I oppose the TECQ proposed list of general APO BMPs. Because of the stockpiles height allowed around communities. there's no such thing as light pollution. TECQ efforts to protect public health has failed the residents of Texas and Joppa .
