To Whom It May Concern,

I'm very concerned that the proposed list of Best Management Practices for Aggregate Production Operations is grossly inadequate. For starters, they do not address practices to minimize water consumption, noise, and light pollution, as was directed to by the Texas Legislature. The BMPs for the areas they do address — dust and water storage — also warrant serious improvement.

I drive near quarries almost every day on Hwy 281 near Burnet and the air quality and dust residue on adjacent plant materials is horrific.

The TCEQ should further develop their list of BMPs, making sure to thoroughly address all of the issues that the Legislature directed them to address.

Sincerely,  
Rhonda Brown
