

Msrky Mander

Please consider these requirements for the future of our continued existence on our property using ground water, being able to see the night sky and allowing people close to these sites to be able to enjoy their lives on their property without undue noise pollution!

Please consider what the Legislature ASKED YOU TO CONSIDER:

" To Whom It May Concern,

I [Marky and Bob Mander] am concerned that the proposed list of Best Management Practices for Aggregate Production Operations is grossly inadequate. For starters, they do not address practices to minimize water consumption, noise, and light pollution, as was directed to by the Texas Legislature. The BMPs for the areas they do address — dust and water storage — also warrant serious improvement.

[OPTIONAL: The churches in Helotes have had major difficulties over the years with the noise and blast from the quarry nearest them and it has affected their foundations and buildings!.]

The TCEQ should further develop their list of BMPs, making sure to thoroughly address all of the issues that the Legislature directed them to address.

Sincerely, Marky Mander
