

James Stepter

To Whom It May Concern,

I am concerned that the proposed list of Best Management Practices for Aggregate Production Operations is grossly inadequate. Where are the papers and research on our water shortage and what the plants use? what are the effects on the pollution generated in our area?

Our well is already sucking the bottom. and it is VERY deep, a lot of neighbors wells are already dry.

The TCEQ should further develop their list of BMPs, making sure to thoroughly address all of the issues that the Legislature directed them to address.

Sincerely,
Jim Stepter
