

Dana Williams

To Whom It May Concern,

The proposed list of Best Management Practices for Aggregate Production Operations is grossly inadequate. For starters, they do not address practices to minimize water consumption, noise, and light pollution, as was directed by the Texas Legislature. The BMPs for the areas they do address — dust and water storage — also warrant serious improvement.

The TCEQ should further develop its list of BMPs, thoroughly addressing all of the issues that the Legislature directed them to address.
