

## Patty Cope

Please change the rules to include regulation of dust, smaller air particles, public road wear and tear, damage and blight to adjoining and nearby properties, taxpayer funded maintenance, and other public nuisances.

Private property rights for aggregate production MUST NOT adversely affect the absolute rights of the public to enjoy clean air, clean water of all categories, safe roads (without dangerous gravel, sand, and pebbles), and healthy public facilities, community properties, and private residences.

Dust particle filtration can be costly, should the filtration expense and mess be pushed onto the public and The People?
