

Andrea Bernkrant

I will be brief. There is no project worth wasting precious water sources in AZ and permanently damaging the natural landscape. None. We already have communities in the valley that have literally run out of water. To allow this project, especially to benefit foreign mining companies who have no vested interest in the welfare of the people or environment of AZ is unconscionable. We cannot continue to ignore the long-term ruination of our land for short-term profits. Do not allow the January Mine Hermosa project to be implemented.
